Dear Jim

RE: VAUXHALL CARLTON 2.0 cdi, REG. 655WAL.

As you are aware, prior to my last service being carried out, we discussed at great length the benefits my car would experience as a result of having it converted to unleaded petrol via the installation of an "ultraburn" system, and this subsequently being fitted during that service back in December '97.

The car has now covered approx. 1500 miles since then and I thought you may be interested to know that not only is it considerably cheaper to fill the tank, but the response of the engine under acceleration is noticeably improved, it almost sounds crisper as it runs, and the reduction of exhaust smoke during cold starts is pleasing to see, thus making for a more eco-friendly vehicle, (well we've all got to do our bit haven't we!). As far as consumption is concerned this has improved slightly as well, quite good when you consider that it is mainly used around the city on short journeys, I am looking forward to even greater savings when I use it for longer trips.

Overall, I am extremely pleased with this device and very grateful to you and your staff for the service and recommendations that you have given so far.

Kind regards

Yours sincerely

ANTON R CAREME
